SUMMARY

I'm a Senior Software Engineer with experience in developing and delivering robust, scalable, and user-friendly applications and ETL pipelines. I'm not opposed to picking up new skills, but I'm most comfortable in the following tech stack: JavaScript/TypeScript, React/Next.js, Node.js (any framework), AWS/GCP, and any SQL or NoSQL database.

EXPERIENCE

Senior Data Engineer (Backend)

Lume Deodorant

May 2023 - July 2025, Nashville, TN

- Assumed full responsibility and became the primary maintainer of a custom, high-volume ETL pipeline within 6 months of hire, integrating data from sources like Shopify, Amazon, Target, Walmart, and UPS.
- Implemented advanced data storage solutions with PostgreSQL, Google Cloud Storage, and Google BigQuery, with the aim of enhancing system reliability through increased redundancy and improving backup capabilities to ensure data integrity.
- Spearheaded efforts to refactor existing enterprise data pipelines, like introducing advanced customization for data requests and modularizing pipelines to extend support for multiple Google Cloud Platform (GCP) projects.
- Architected and implemented a comprehensive Vitest (originally Jest) testing suite, transitioning from no tests to achieving over 80% test coverage within a year of hire, substantially improving code reliability and system stability.
- Created and maintained comprehensive documentation for our team, encompassing topics like on-boarding procedures, testing protocols, and API documentation, significantly elevating knowledge sharing and team productivity.
- Led cross-functional initiatives and refined the team's roadmap based on the needs of the stakeholders.
- Primary technologies: JavaScript, Node.js (Express), PostgreSQL, GCP (App Engine, BigQuery, Cloud Build, Cloud Scheduler, Cloud Storage, Compute Engine, Secret Manager), AWS S3, FTP/SFTP, Jest, Vitest

Software Engineer (Full Stack)

Built Technologies

July 2022 - February 2023, Nashville, TN

- Bootstrapped and owned a crucial microservice to modernize and deprecate an existing business service.
- Worked on a cross-functional product team and collaborated with other teams to provide support in delivering time-sensitive features.
- Actively participated in Agile process - work breakdown, refinement, estimation, planning, and execution of software development work as part of a scrum team.
- Regularly performed code and design plan reviews, provided programming estimates, identified potential problems, and recommended alternative solutions to improve existing features and workflows.
- Primary technologies: TypeScript, React.js, Node.js (Express), GraphQL, AWS (DynamoDB, S3, Cloud9), Jest, React Testing Library, Git, Github.

Software Developer (Backend)

Planview - LeanKit

March 2020 - July 2022, Franklin, TN

- Built, evolved, deployed, monitored, and maintained backend microservices to power critical user experiences with focus on high availability, low latency, and scalability
- Modified and added new features and RESTful API routes.
- Maintained 100% test coverage for unit and integration tests for backend services and APIs.
- Troubleshooted and resolved production code and platform issues.
- Participated in software design and code reviews.
- Researched and applied new technologies as appropriate.
- Primary technologies: JavaScript, Node.js (Express, Hapi, Fastify), SQL Server, PostgreSQL, Mocha + Chai, Docker, Git, Github.

Rating Veterans Service Representative

Department of Veterans Affairs

October 2011 - March 2020, Nashville, TN

- Made decisions regarding Veteran disability claim determination, to include determining if a claimed disease or disability was incurred in or aggravated by military service; the severity of such disability (service-connection percentage); and the entitlement to any ancillary benefits.
- Assured proper application of the VA's disability Rating Schedule and other applicable instructions, and accountability for proper analysis; appropriate development; and accurate final rating determination.
- Provided consultative advice to supporting team members to help develop their skills in gathering evidence for rating decisions.
- Acted as an advocate for Veterans and their beneficiaries between the VA and any other organizations that affect their claims.

Senior Paralegal NCO

United States Army Reserve

September 2004 - April 2014, Nashville, TN

- Served in the U.S. Army Reserve for 10 years, working as a Human Resources Sergeant for roughly 8 years and a Senior Paralegal NCO for roughly 2 years.
- Acted as First Sergeant for the unit, mentoring junior enlisted soldiers and improving team growth and collaboration.

- Designed and implemented training programs to meet unit requirements.
- Supervised the administration of all military justice matters, including courts-martial.
- Maintained a Secret Security Clearance.

Postal Sergeant/Supply Sergeant

United States Army

July 2007 - August 2008, Taji, Iraq

- Served as a Postal Sergeant, Unit Information Management Officer, Technical Inspector, and Supply NCO in an Army Post Office (APO) unit deployed in support of Operation Iraqi Freedom (OIF) 07-08 servicing over 120 units and more than 20,000 Soldiers, DoD civilians, and contractors.
- Assisted the Technical Inspector with inspecting over 120 unit mail rooms
- Trained over 200 unit mail clerks in proper mail room procedures.
- Ordered and maintained supplies and materials for the Camp Taji APO and the Postal unit that exceed a value of \$500,000.

PROJECTS

Software Engineer (Full Stack)

SWGOW Counters

August 2019 - April 2022, Nashville, TN

A companion app for the mobile game Star Wars: Galaxy of Heroes, used as a reference guide for players to look up which teams are best to use against teams they are battling.

- I built the mobile-first, responsive frontend with React and the backend with Node.js and Fastify. Firebase is used for authentication. AWS is used for deployment (hosting and database services).
- The site has an average of **30k+ users** and **600k+ pageviews per month**, and a community of **500+ Patreon contributors** and **2000+ Discord users**.
- I also built a Discord bot using Node.js and Discord.js, which was deployed via a DigitalOcean Linux VPS.
- Primary technologies: JavaScript, React, Node.js, Fastify, AWS (RDS, Elastic Beanstalk, CloudFront, S3, MySQL, Firebase, NoSQL, Git, Github, HTML, CSS, Github Actions (CD/CI), Google Analytics, Google Adsense

EDUCATION

Software Development Bootcamp

Nashville Software School

February 2020, Nashville, TN

Intensive one-year software development bootcamp focusing on learning full stack development fundamentals and problem solving skills through real-world methodologies.

- Built browser-based single page applications using HTML, CSS, JavaScript, jQuery, and React
- Developed server-side solutions using C# and .NET Core in Visual Studio
- Designed responsive applications using Bootstrap and Reactstrap
- Accessed and exposed data using RESTful APIs
- Database management using SQL Server and Firebase
- Hands on application of OOP fundamentals through group and individual projects reflecting real world business problems
- JavaScript fundamentals leveraging DRY, modular, readable code, and reusable components
- Task automation and module bundling with Webpack, linting with ESLint
- Source code version control with Git/Github
- Project management/tracking with Github Projects

B.S. in Spanish Language and Literature, Minors in Business Administration, and Nutrition and Food Science

Middle Tennessee State University

December 2010, Murfreesboro, TN

SKILLS

Agile	AWS	BigQuery	Bootstrap	Clickup	Cloud Storage	CSS	Cursor AI
Docker	DynamoDB	Express	Fastify	Firebase	FTP	GCP	Git
Github	Github CoPilotI	GraphQL	HTML	JavaScript	Jest	Jira	Kubernetes
Mocha + Chai	MySQL	Next.js	Node.js	PostgreSQL	React	React Testing Library	REST
S3	SASS	SFTP	SQL Server	Tailwind	TypeScript	Vitest
